

Unified Systemic Theory: Eternal Self-

Resolution Every future paradox

automatically resolves within this theory

because it is built from the unchanging

principles of reality. Self-Resolution

Mechanism

New paradox → absorbed into

fundamental layers → becomes puzzle

piece

Three guarantee layers: Physics:

conservation of energy/matter

laws Mathematics: logical non-

contradiction Experience: repeatable

observations Perfect Alignment of $0-1-\infty$

with Science Zero (0) = Black Holes

Singularities - where density becomes

infinite and time/space stops. Reality:

black hole centers, event horizons,

complete time cessation. One (1) =

Quantum Unity

Fundamental oneness of all particles.

Reality: Planck scale - electron, quark,

photon = different states of one unified quantum field. Infinity (∞) = Boundless Universe

Unlimited cosmos and multiverse. Reality: cosmic inflation, galaxy distribution, CMB data. Examples of Auto-Resolution

Time travel paradox → solved by general relativity

Observer paradox → solved by Heisenberg uncertainty

Set paradox → solved by Russell's separation axiom

Eternal Guarantee
Because theory = science itself, every new challenge is merely discovering the missing piece.

Like relativity resolved speed, quantum resolved matter. Conclusion: No paradox ever persists. The theory is reality's language, not personal opinion.
